## INSPECTION.

State Board of Agriculture.  
Official Certificate No. 20.

Boston, Sept. 26th, 1902.

*To whom it may concern:*

This is to certify that I have this 26th day of September, 1902, completed the inspection of the nursery stock of Cherry Hill Nursery, T. C. Thurlow, proprietor—grown at West Newbury, State of Massachusetts—and find it to be apparently free from the San Jose scale and other injurious insects and diseases which might be transferred on nursery stock from the nursery to orchard or garden.

This certificate is good until July 1st, 1903.

(Signed) H. T. FERNALD, *Inspector.*

Established over 70 years

Spring of 1903

## WHOLESALE CATALOGUE

OF THE

# Cherry Hill Nursery

5½ miles from Newburyport. 2½ miles from Byfield Depot.  
1½ miles from the West Newbury Electric Road—about  
half-way between Newburyport and Haverhill.

WEST NEWBURY, MASS.

**T. C. THURLOW & CO., Proprietors**

We do not offer as large an assortment as some nurserymen; our aim for years has been to *cut down* to as few varieties as possible, and those the best and most approved. We still keep more large specimen trees and shrubs than are usually found in nurseries. These will produce an *immediate effect*, for those who do not want to wait for small trees to grow.

We can furnish, of extra size, hundreds of Norway and Sugar Maples, Elms, Ash, Poplar, Plane, and Willows—Evergreens, 3 to 4, and 4 to 6 feet high, well furnished—Shrubs including the Japan Snowball, single and double—Magnolias, several best varieties of blooming size—Wistarias, the Chinese blue, and white, of very extra size.

These large trees if properly planted are quite sure to grow. Last Spring (May 1, 1902) we sent two hundred Sugar Maples, 16 to 18 feet tall, to a party fifty miles beyond Boston. They were packed in covered cars, with only damp hay and mats around the roots. They were cared for and planted by a *man who understood his business*. In the fall every one was alive and flourishing. Our soil is the *best*, being generally a strong loam, underlaid with clay, producing good tops with plenty of roots. Our expenses are comparatively light, and we aim to sell stock at reasonable prices. We do not employ agents, or offer any commission or “presents” to gardeners or others, but try to deal squarely with every one.

We can deliver with horse teams, within 25 or 30 miles, any heavy or valuable stock much cheaper than it can be sent by rail, charging only for time of men and horses on the road. Large buyers or dealers can buy stock by the row or block at less than these prices, while trees *personally selected* in the nursery will be charged for according to size and beauty, and not at wholesale rates.

TERMS CASH. All Spring bills will be due June 1st; Autumn bills, Dec. 1st.

## DECIDUOUS TREES.

	Each	Per 10	Per 100
<b>Ash</b> —American White, 4 to 5 feet.....		\$2 50	\$20 00
“ “ 15 feet (2 to 3 inches).....		10 00

<b>Thorn</b> —Double red, white, and pink, 4 to 6 feet .....	1 00	8 00	
--	------	------	--

<b>Tulip Tree</b> —6 feet.....	1 00		
3 feet.....	50	4 00	

<b>Virgilia</b> —Lutea, very large.....	\$2 00 to 5 00		
“ 18 to 24 inches.....		1 00	10 00

<b>Willow</b> —Britzensis (brilliant crimson), 3 to 5 feet .....	1 00	6 00	
“ “ “ 5 to 8 feet .....	1 50	10 00	
Laurel-leaved, 2 to 4 feet, very bushy .....	1 00	8 00	

## WEeping TREES.

	Each	Per 10	Per 100
<b>Beech</b> —5 to 18 feet .....	\$1 50 to \$15 00		
<b>Birch</b> —Cut-leaved, 1 year, 3 feet .....	60	\$ 5 00	
"    4 to 5 feet (twice transplanted) .....	1 00	9 00	
<b>Elm</b> —Camperdown, 6 to 8 feet .....	\$1 00 to 2 00		
<b>Maple</b> —Wier's cut-leaved, 6 to 8 feet, <i>fine</i> .....	1 00	8 00	
<b>Mulberry</b> —Tea's weeping Russian (very extra) .....	\$1 50 to 3 00		
<b>Willow</b> —Kilmarnock, New American, heavy trees .....	\$1 50 to 3 00		
<i>Thurlow's Weeping</i> (new), 5 to 7 feet .....		1 00	\$ 8 00
"    "    6 to 8 feet .....		2 00	15 00
"    "    10 to 13 feet .....		3 00	25 00
"    "    12 to 15 feet .....		15 00	100 00
Finest selected specimens .....	2 00		

This new weeping willow has proved hardy and desirable in most of the Northern States, and is being propagated by the larger nursery men in New York, Ohio, etc. Our largest trees are the finest we have ever seen—growing on the top of a high hill, fully exposed to the winds, are furnished from top to bottom, and are perfectly healthy.

## EVERGREENS.

 Large Evergreens do better if planted EARLY. In April, if possible, before the buds push, or in August and September.

<b>Arbor-vitæ</b> —Siberian (the <i>best</i> arbor-vitæ for this section), 12 to 18 inches .....		3 00	15 00
Siberian (the <i>best</i> arbor-vitæ for this section), 18 to 24 inches .....		4 00	25 00
<b>Fir</b> —Concolor, 4 to 6 inches, 2-year seedlings, per 1,000 \$50 .....		1 00	6 00
"    2½ to 4 feet .....		10 00	75 00
"    4 to 5 feet .....		15 00	
"    5 to 6 feet .....		25 00	
We have a few concolor fir, 6 to 7 feet, worth \$4 to \$8 each. The <i>blue</i> trees are worth more than the common green ones.			
Fraseri (better than Balsam Fir), 2 feet .....		3 50	
Nordman, a few plants, 2 to 5 feet .....	\$1 00 to 3 00		
<b>Hemlock</b> —The Hemlock Spruce, 12 inches, bushy .....		2 00	15 00
<b>Juniper</b> —Daurica, fine and hardy, 6 feet .....	1 00	10 00	
Irish, 4 to 6 feet .....	75	6 00	
Suecica nana, one of the prettiest, 2 feet .....	1 00	10 00	
Sabina, a spreading variety, 18 inches .....	75	6 00	
<b>Pine</b> —Austrian, 12 to 18 inches, twice transplanted .....		2 00	12 00
"    18 to 24 inches, twice transplanted .....		3 00	16 00
"    3 feet, very bushy .....		5 00	40 00
A valuable pine for this country, especially near the <i>seashore</i> , where it is entirely hardy.			
Cembra (Swiss Stone Pine), very handsome, 2 to 3 feet .....	1 00	10 00	
"    "    "    "    3 to 4 feet .....	2 00	15 00	
White Pine ( <i>pinus strobus</i> ), 5 to 8 inches, twice transplanted .....		75	6 00
"    "    "    "    8 to 12 inches, twice transplanted .....		1 00	8 00
"    "    "    "    12 to 15 in. (fine bushy plants) ..		1 50	12 00

**Pine**—*Continued.*

	Each	Per 10	Per 100
White Pine ( <i>pinus strobus</i> ), 18 to 24 in. (fine bushy plants) ..		\$ 2 00	\$ 15 00
This we consider altogether the most valuable pine for the Northern States. It has been our specialty for years, and we have now to offer over thirty thousand as pretty pines as one would wish to see; all raised from <i>Northern seed</i> .			

<b>Retinispora</b> — <i>Plumosa aurea</i> , 10 to 12 inches, fine.....		2 00	18 00
“ “ 6 feet.....	\$1 00	10 00	
<i>Squarosa</i> , 4 feet.....	1 00	10 00	
<b>Spruce</b> — <i>Douglas</i> (from the Rockies), 3 to 6 feet.....	1 00	8 00	
“ “ “ “ 6 to 8 feet.....	1 50	10 00	
Dwarf Black (balls 12 inches) .....	1 00		
Engelmanni (selected blue), 3 to 4 feet, bushy.....	2 00	18 00	
“ “ “ 4 to 5 feet, bushy .....	3 00	28 00	
Engelmanni, green, 3 to 4 feet.....	75	6 00	
“ “ 4 to 5 feet.....	1 00	8 00	
Norway, nice plants, twice transplanted, 12 to 15 inches...		1 50	12 00
“ “ “ “ 18 to 24 inches...		2 00	15 00
“ “ “ “ 2 to 2½ feet.....		2 50	20 00
Oriental, 2 to 3 feet.....	1 00		
<i>Pungens</i> ( <i>picea pungens</i> of Colorado), <i>selected blue</i> , 2 to 3 ft.,	3 00	25 00	200 00
“ “ “ “ “ “ 3 to 4 ft.,	4 00	35 00	300 00
“ “ “ “ “ “ 4 to 6 ft.,	5 00	45 00	
“ “ “ “ “ “ green type, 2 to 3 ft.,	75	5 00	35 00
“ “ “ “ “ “ 3 to 4 ft.,	1 00	7 50	50 00
Pyramidal, very heavy, and full, 6 to 7 feet.....	5 00		
White, a fine native Spruce, 12 to 18 inches.....		2 00	15 00
“ “ “ “ 6 to 8 feet.....		7 50	50 00
“ “ “ “ 7 to 9 feet.....		15 00	
The White Spruce, 6 to 8 feet and 7 to 9 feet, are too large to box up, but if moved in wagons, with care, would stand a fair chance of living.			

## EVERGREEN SHRUBS.

<b>Andromeda</b> — <i>Floribunda</i> (just imported), 9 to 12 inches.....		6 00	50 00
“ 12 to 18 inches (bushy).....	1 00		
<b>Azalea</b> — <i>Amæna</i> , 8 to 12 inches.....	75		
<b>Daphne</b> — <i>Cneorum</i> , 6 to 8 inches, spreading.....	75		
<b>Kalmia</b> — <i>Latifolia</i> (Mountain Laurel), 6 to 10 inches.....	1 50	10 00	
“ “ “ 12 to 18 inches.....	3 50	25 00	
“ “ “ 18 to 24 inches.....	5 00	40 00	
All our <i>Kalmias</i> have been recently transplanted, are nice, compact plants, and will all lift with a ball of earth; hence, can be transplanted up to midsummer.			
<b>Box</b> —Dwarf for edging, 8 to 12 inches, \$50 per 1,000.....	1 00	6 00	
“ “ “ 12 to 15 inches.....	1 50	8 00	
<b>Rhododendrons</b> — <i>Ponticum</i> , 15 to 24 inches. Have for 3 years proved hardy.....	4 00	25 00	
Maximum (native), 12 to 18 inches (clumps) ..	4 00	25 00	
Hardy Hybrids (15 named varieties), 2 to 2½ feet.....	\$2 00 to 2 50	20 00	
Hardy Hybrids and Seedlings, a few very large .....	\$3 00 to 5 00		

## DECIDUOUS SHRUBS.

	Each	Per 10	Per 100
<b>Altheas</b> —Four or five good kinds.....	25c to \$0 50	\$ 2 50	
<b>Azalea</b> —Arborescens (fine white), 18 to 24 inches.....		4 00	\$35 00
Calendulacea (orange), 12 to 18 inches.....		3 00	25 00
“        “        18 to 24 inches.....		4 00	35 00
Nudiflora (pink), 6 to 10 inches.....		2 00	15 00
Vaseyi, pink and rose, 12 to 18 inches.....		3 00	25 00
“        18 to 24 inches.....		4 00	35 00
Viscosa, white, 12 to 18 inches.....		2 50	15 00
The above native Azaleas are very nice, compact plants, largely with flower buds, and all will lift with a ball of earth. Planted in damp or wet land they are truly <i>magnificent</i> .			
Mollis, 2 to 2½ feet,.....	50c to 1 00		
Belgian varieties, very large.....	\$1 50 to 4 00		
<b>Aralea</b> —Japonica, 8 to 10 feet, \$1 00; 2 to 4 feet.....	35	3 00	
<b>Berberis</b> —Common Barberry, for low hedges, 12 to 15 inches, per 1,000, \$20 00 (2 years).....	50	3 00	
THUNBERGH (Japan Barberry) 12 to 18 inches.....	1 00	7 00	
“        “        18 to 24 inches.....	1 50	10 00	
“        “        2 to 2½ feet, <i>fine</i> .....	2 00	15 00	
<b>Black Alder</b> —Valued for its red berries, 2-year seedlings, 12 in.,		50	3 00
<b>Calycanthus</b> —Floridus, 2 to 3 feet.....		2 50	
<b>Chyonanthus</b> —Virginica (white fringe), 3 to 4 feet.....	50	4 00	
<b>Colutea</b> —Arborescens, 3 to 5 feet.....		1 50	10 00
<b>Cornus</b> —Sanguinea, 2 feet (branched), \$20 00 per 100; 4 to 5 feet, <i>extra</i> .....		5 00	40 00
<b>Desmodium</b> —Pendulifolium, 3 feet.....	50	4 00	
<b>Deutzia</b> —Gracilis, big clumps, 25c.; 8 to 10 inches.....		1 00	5 00
Scabra, Crenata, Parviflora, etc., 3 to 4 feet.....		3 00	
LEMOINE, very fine, 2 feet, bushy.....	35	3 00	20 00
<b>Dirca</b> —Palustris, 18 inches.....	25	2 00	
<b>Elder</b> —Golden, 2 feet, 35c.; <i>small plants</i> .....	15	1 00	6 00
<b>Euonymus</b> —4 varieties, 2 to 4 feet.....	35	3 00	
<b>Forsythia</b> —Fortuni, Sieboldi, Intermedia, etc., <i>large</i> .....	75	6 00	
<b>Honeysuckle</b> —Upright (red and white), 2 to 3 feet.....	35	3 00	
<b>Hydrangea</b> —Paniculata, 2 to 3 feet (cut back, bushy).....	35	2 00	15 00
“        18 to 24 inches (cut back, bushy).....	25	1 50	10 00
“        single flowered, heavy, 4 feet.....		4 00	
<b>Halesia</b> —Tetraptera (snowdrop tree), 2 feet.....	35	3 00	
<b>Japan Quince</b> —(Pyrus Japonica), 2-year seedlings, 5 to 7 inches, per 1000, \$15.....		50	2 00
(Pyrus Japonica), bushy plants, 3 to 4 feet.....	35	3 00	20 00
This is one of the <i>best</i> shrubs for a low hedge. Perfectly hardy in all situations; beautiful in flower and foliage.			
<b>Lilac</b> —Charles X, 2 to 3 feet, \$15 per 100; 3 to 4 feet, <i>extra</i> .....	50	4 00	
Lemoine's, mixed, single, and double, 3 feet.....	50	4 00	
Marie Legrey, Rothmagensis, white, 2 to 3 feet.....	35	3 00	
Villosa, <i>very heavy</i> , 5 to 6 feet.....	1 50		
<b>Philadelphus</b> —(Syringa), 3 or 4 best kinds, 2 to 3 feet.....	35	3 00	20 00

ESTABLISHED 1832.

SEPTEMBER, 1902

## Cherry Hill Nursery

T. C. THURLOW & CO., Props.

West Newbury, Mass.

Nursery 1 1-2 miles from the West Newbury Electric Road,  
about half-way between Newburyport and Haverhill.  
5 1-2 miles from Newburyport.  
2 1-2 miles from Byfield Depot.

The Nursery is open to inspection during any week day, and gentlemen or their gardeners are kindly invited to call and look over the stock.

We have for over twenty-five years been supplying *hardy trees and shrubs* to seashore residents, especially along the North Shore from Boston to Bar Harbor, and nothing but what is tried and hardy is recommended. The following stock can be now seen growing upon our grounds.

We have of late years been in the habit of teaming bulky and valuable stock over the road; anywhere within thirty or forty miles it can be transported *cheaper* and *safer* in this way than by rail. The trees are packed, without exposure, on suitable wagons, in damp hay, and covered with sails, and delivered the day they are wanted for planting. We only charge for the man and horses when delivering.

Having recently made an extensive tour through some of the largest nurseries in the country, I find no better, well grown, blue Rocky Mountain Evergreens than are to be found in our nurseries. Among them we would mention the following:

**250 Abies Concolor** — (Concolor Fir) from the Rockies, 3 to 7 feet tall.

**3000 Abies Concolor** — (Concolor Fir) 5 to 8 inches, very blue seedlings. This beautiful tree is difficult to transplant, unless taken very early in the spring, or in August or September. It is a fine seashore tree, hardy within a few rods of the ocean at Manchester-by-the-sea or Bar Harbor, Maine. The steel-blue trees are the most desirable and command a high price.

**150 Picea Pungens** — (Colorado Blue Spruce), selected blue, 3 to 5 feet.

**500 Picea Pungens** — (Colorado Blue Spruce), selected blue, 1 to 3 feet.

**300 Picea Engelmanni** — (Engelman's Spruce), selected blue, 3 to 5 feet, *bushy*. Another very valuable Colorado Spruce, more compact and dense than *Picea Pungens*, but blue ones can hardly be distinguished from it. Easily transplanted and perfectly hardy.

**1000 Picea Alba**—(White Spruce), 6 to 8 feet. A most desirable tree, native of New England and hardy everywhere. These are too large to box up, but if delivered by team and carefully planted, will be pretty sure to live. They make fine specimens or a beautiful hedge.

**5000 Picea Excelsa**—(Norway Spruce), 12 to 24 inches. Used largely for hedges and wind-breaks, also for groves and separate planting.

**150 Picea Douglasii**—(Douglas Spruce), 5 to 7 feet. Another Colorado Spruce of considerable merit. Hardy and very vigorous.

**400 Pinus Austriaca**—(Austrian Pine), 2 to 2½ feet; transplanted last year.

**2000 Pinus Austriaca**—(Austrian Pine), 12 to 18 inches; transplanted last spring.

**30,000 Pinus Strobus**—(White Pine), 8 to 12 and 12 to 18 inches; fine and *bushy*. We make a specialty of these, the best of Pines. All have been grown with great care without crowding.

**150 Pinus Cembra**—(Swiss Pine), 1½ to 3 feet. A beautiful hardy Pine.

**40 Retinispora Squarosa**—4 feet. **150 Retinispora**—*Plumosa aurea*, 2 to 4 feet.

**50 Retinispora**—*Filifera*, 3 to 4 feet. **100 Irish Juniper**—3 to 4 feet.

**50 Juniper**—*Suecica nana*, 2 to 3 feet. **50 Juniper**—*Daurica*, 5 to 6 feet.

**1500 Siberian Arbor Vitæ**—The most beautiful variety; 12 to 15 inches.

*N. B.*—If evergreens are not planted by September 25, better wait till early spring.

The best season for planting Pæonies, Iris, Phlox, Lilies, and other bulbs, is in September and October.

**12,000 Hardy Phlox**—Named kinds and seedlings; also a few each of new and rare varieties.

**8000 Iris Kaempferi**—(Japan Iris), over 40 varieties; the best to be obtained.

**1200 Lilium Speciosum**—Hardy Japan Lilies: *Rubrum*, *Album* and *Praecox*.

**15,000 Herbaceous Pæonies**—Over 400 varieties, single and double.

We hope before long to print a full descriptive list.

**300 Tree Pæonies**—Extra blooming plants; over 50 varieties, many of them the new single Japan Pæonies.

**2000 Yucca Filiamentosa**—2 years' plants.

## Hardy Trees (Suitable for Fall Planting).

### WE OFFER:

**6000 Sugar or Rock Maples**—10 to 20 feet tall; 1 to 3 inches in diameter.

**500 Sugar or Rock Maples**—3 to 5 inches in diameter.

The Sugar Maple for our climate is the *best* ornamental and shade tree. Clean, free from insects, a vigorous grower and perfectly hardy; easily transplanted, either in Spring or Fall, and not apt to break by the wind. We have made this a specialty for many years, and can furnish trees from one-half up to four or five inches in diameter. We will make prices very reasonable on selections in the nursery.

**1000 Silver or Soft Maples**—7 to 10 feet. A rapid growing, cheap tree.

**3000 Norway and Sycamore Maples**—6 to 10 feet. The Norway and Sycamore Maples are very suitable for the seashore.

**Red Leaved, Variegated Leaved, and Cut Leaved Maples**; also the beautiful new **Japan Maples**, with colored foliage.

**Oaks** of various kinds, mostly of medium size.

**1000 American Elms**—Some of extra size, 12 to 18 feet.

Cornus, Chestnuts, Beeches, Catalpas, Horse Chestnuts, Kolreuteria, Kentucky Coffee Trees, Thorns, *Virgilia Lutea*.

**1000 Lombardy**—And other Poplars of good size very low.

## For Spring Planting.

All the above, and many *rare* trees and shrubs not always found in nurseries.

**1000 Hardy Magnolias**—Six varieties; small trees imported last year.

**500 Hardy Magnolias**—Of large blooming size, *viz.*: *Speciosa*, *Glauca*, *Lennei* (red), *Conspicua*, *Soulangeana*, *Acuminata* and *Tripetala*.

**Double Flowering Crabs**—Thorns, Birches, Ash, Linden, Butternuts, Chestnuts, Cornus or Dogwood, both the white and *red* variety, of large blooming size.

**Willows for Hedges**—The Kilmarnock and New American Weeping, also a large stock of the *ThurLOW Weeping Willow*, hardy anywhere, the *Laurel Leaved Willow* for seashore, and the brilliant red for winter effect.

## Rare Shrubs.

**Japan Snowball** (*Viburnum Plicatum*) and the beautiful single variety, ***Viburnum Tomentosum***, both of large blooming size. Also 5000 small plants of both varieties.

**5000 Berberis Thunbergii**—All sizes. One of the most useful shrubs, both for low hedges and the border. Common and purple leaf *Berberis*; Spireas, Weigela, Hardy Tamarix, Calycanthus, White Fringe, *Colutea*, Deutzias, Honeysuckle, Lilacs, including several new and rare ones.

**3000 Hardy Hydrangeas**—Both bush and tree form.

**3000 Japan Quince**—For hedges, etc., etc.

## Evergreen Shrubs.

### WE OFFER:

- 4000 Kalmia Latifolia**—or Mountain Laurel. Nice bushy plants, many with bloom buds; 6 to 10 and 12 to 18 inches.
- 1000 Native Rhododendrons**—Rhododendron Maximum. Small plants.
- 600 Imported, Hardy Rhododendrons**—Best named varieties; 2 to 4 feet tall and bushy.
- 1000 Cheap Rhododendrons**—(Rhododendron Ponticum), 12 to 18 inches.
- 800 Andromeda Floribunda**—8 to 12 inches. To arrive from England in the spring.

## Hardy Deciduous Shrubs.

It is surprising how long we have been sending abroad for our shrubs and plants, and neglecting those growing wild in our own country. There is a wealth of beauty in the shrubs of the lower Alleghanies not equalled by any of the imported ones. The Azaleas, Kalmias, Rhododendrons and Andromeda Floribunda are all perfectly hardy at the north, and with suitable soil and conditions, will do as well as on their native mountains. Of the native Azaleas, the first to bloom is the *Vaseyi*, of a beautiful pink and rose color, then the *Calendulacea*, buff to deep orange. Mr. Jackson Dawson says it is "The best in the world." Then the *Arborescens*, pure white and very fragrant. Of the two Azaleas indigenous to New England, the *Nudiflora* (early pink or red) and the *Viscosa* (white) we are getting up a stock, but have no very good ones for sale yet.

We can now offer:

- 1500 Azalea Vaseyi**—bushy plants, 12 to 15 inches, full of flower buds.
- 2000 Azalea Calendulacea**—bushy plants, 12 to 18 inches, full of flower buds.
- 2000 Azalea Calendulacea**—bushy plants, 8 to 12 inches, many budded.
- 2000 Azalea Arborescens**—bushy plants, 12 to 18 inches, mostly budded.
- 2000 Azalea Viscosa**—well rooted; 2 years collected.
- 1000 Azalea Nudiflora**—small, but a few blooming plants.
- 200 Belgian and Azalea Mollis**—extra blooming plants.
- 1000 Hardy Chrysanthemums**—Five colors.
- 3000 Helianthus Maximilianus**—very tall and showy. Desirable on account of its late blooming, after most other flowers are gone.
- 2000 Astilbe**—(*Spirea Japonica*), large clumps.
- 2000 Golden Glow**, and other Herbaceous plants.

## Climbing Vines

Of the common varieties, including a large lot of *Wistarias*, Chinese blue and white, and *Multi-juga*—all strong plants; Honeysuckle, Woodbine, *Clematis Paniculata*, etc.

## Roses.

A few of the best hardy varieties of Hybrid Perpetual, Climbers, including a lot of strong *Crimson Rambler*, and the new yellow rose, *Soleil d'Or*.

## Fruit Trees and Small Fruits,

Grape Vines, etc. We keep a few of the most valuable for this section.

N. B. We publish a complete Price List of stock in September, which will be mailed free to all who apply for it.
